Ferry Management

Comprehensive Ferry Management

Advanced maintenance, drydock planning, and meticulous crew management ensure robust foundational support

Inventory and Financial Oversight

Streamlined management of technical inventories and financial operations to enhance efficiency and control

Safety and Compliance

Emphasizes health, safety, environmental, and quality standards through comprehensive HSEQ management

Digital and Eco-friendly Operations

Adoption of paperless processes and digital transformation for operational efficiency and sustainability

Performance Monitoring

Optimized vessel operations, by analyzing fleet performance insights and analytics

HR & Payroll

Crewing

Centralized management of activities and data of seafarers onboard and ashore

Seafarer Portal

Track, monitor, and communicate with your vessel anytime, anywhere

New Applicant

Quickly manage seafarer applications and recruitment processes

Payroll

A dynamic and advanced payroll processing system for managing multi-national, multi-currency transactions and payroll calculations for the crew onboard

Sea Roster

Manages onboard requirements for crew work – rest hour regulations, ensuring crew safety

Ticketing

Travel management solution for travel agents and their customers via desktop

Crewing

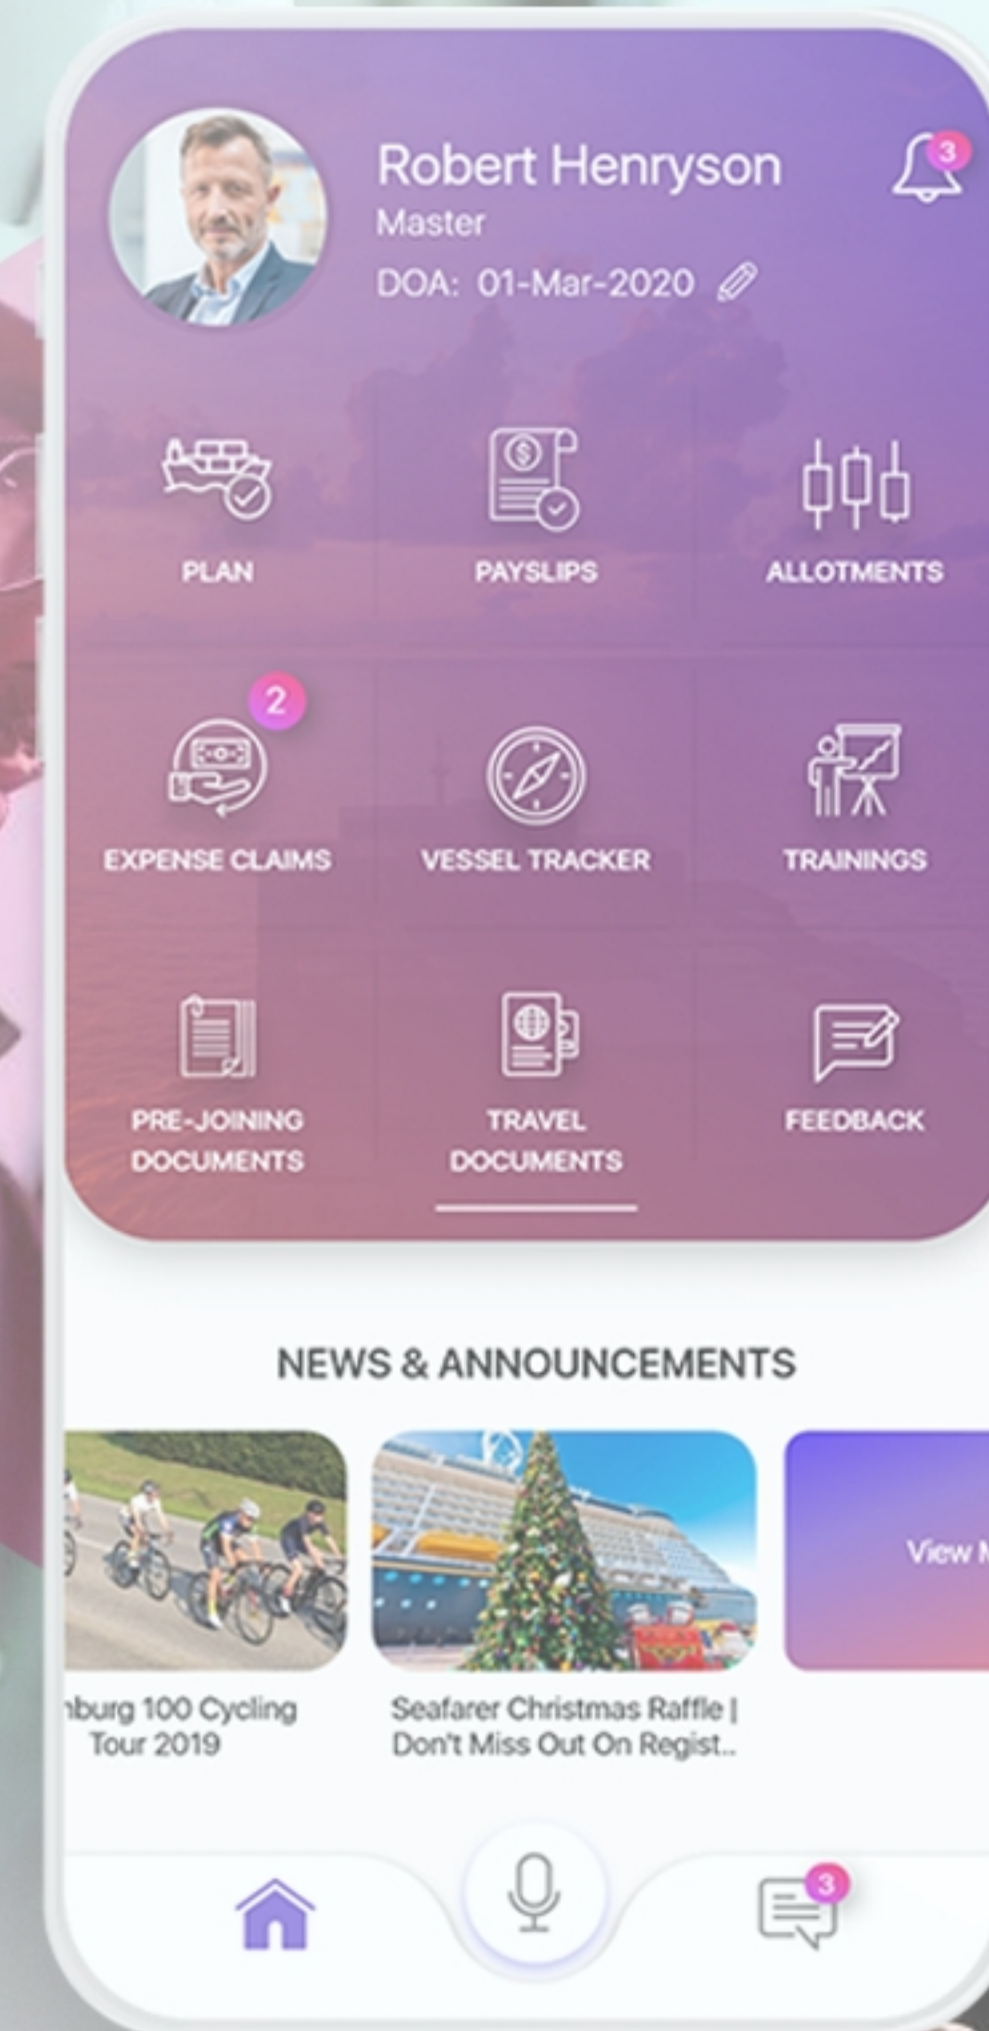

Centralized system to manage the activities and data of both seafarers working onboard and ashore. Manage employee contracts, payrolls, documentation, training, claims, expenses, and activities. Track activity year-round for salary and fee-based employees.

- Cloud-centric workforce management supported with mobile apps to track overall crew details anywhere, anytime
- Exchange quotations and PO budgets
- Crew management made seamless via Applicant portal, with consistent data integration to other modules like Crewing, Ticketing, Sea Roster, Payroll, Voyage, Procurement, Accounts, Insurance, Catering, and Seafarer portal
- Custom dashboards with dynamic views for quicker analysis and more efficient decision making
- Integration with third party vendor systems like Seagull, Videotel, OCIMF, Q88, and various other systems for effortless data processing
- Access comprehensive graphical planning of seafarers as per vessel requirement document checks. Provision to select crew based on management requirement and Owner specifications

Seafarer Portal

Track, monitor, and communicate with your vessel anytime, anywhere

- View planned voyages, scheduled trainings, and provide date of availability
- Access travel documents
- Allotments detailed payslips and incidental expenses
- Chat live with the crewing department, update local contact details, download full documents with expiration status highlighted
- Provide alerts and notices of amendments including IMO regulation changes

New Applicant

Our marine recruitment software, accessible via web and mobile portals, allows users to manage applicant profiles and processes efficiently. Our recruitment application connects to *ferryPAL* Crewing to facilitate the process of screening and handling applicants.

- Centralized data of new applicants for convenient accessibility and retrieval
- Public portal to register new applicants of potential seafarers
- Upload offline application forms
- Configure approval processes for selection of candidates

Payroll

A versatile and advanced payroll processing system to manage multi-national, multi-currency transactions, and payroll calculations for the crew onboard. Provides efficient management of monthly payrolls for both salary and fee-based seafarers. Seamlessly integrated with Crewing and Accounts modules for managing crew contracts, dispersal of wages, and automatic transaction interfaces. Export to various e-banking systems for payments with interfaces that additionally allow for the preparation of accounting entries.

- Monthly inputs and shipboard deductions entered via the vessel module
- Payslip generation and processing can be done on the vessel module
- Personalized allotment processing
- Payroll charges reporting
- Portage bill integration, incidental expenses, booking, and payments
- Access pay slip on seafarer web or mobile portal
- Wage and automated bonus calculator
- Configurable allotment and bank charges

Sea Roster

Sea Roster is a crew management software that manages the requirements onboard for compliance with crew work and rest hour regulations (STCW 2010, ILO MLC, US OPA 90, and OCIMF recommendations). The crew management software closely monitors any repeat deficiencies and adjusts future working routines onboard to prevent excessive working hours and reduce fatigue amongst the seafarers. Sea Roster can act as a standalone module or can be combined with Crewing, *smartOps*, and Accounts. It allows for the transfer of crew and vessel information, while the voyage plan is provided by the *smartOps* module.

- Work hour – rest hour tracking, based on guidelines by global manpower regulatory bodies
- Management of individual and bulk schedules
- Provision to create plan from templates
- Integration with Payroll module for overtime calculations
- Data Library for job planning
- Integration with Crewing module for various seafarer related details
- Can increase deferred efficiency in task management
- Japanese flag state requirements for work hour - rest hour regulations

Ticketing

Holistic travel management system acting as a bridge between corporate companies and travel agent groups. Travel agents can manage travel requests, raise ticketing options, and process them. Ticketing provides management with reports that provide insight into travel expenditure, destination reports, and other relevant data.

- Single solution for travel agents and for their customers
- Simple and intuitive to configure, manage, and use
- Create, track, and manage all travel request on a single platform
- Tailored ticketing process to suit ship management companies
- Achieve minimal assistance from travel agent
- Integration with GDS systems worldwide
- Integration with HR, Crewing, and Finance modules Obtain public, marine, and corporate fares

Procurement

A comprehensive inventory and procurement management system that can be integrated with other onboard modules. It enables seamless data flow through the Maintenance and Accounting modules that provide a platform to track stock levels, forecast spares demand, job planning, manage vessel budgets, and track vendor turnover. *ferryPAL's* Procurement application can be integrated with third-party business-to-business (B2B) platforms and Vendor ERP systems.

Health, Safety, Environment, & Quality

HSEQ

A complete integrated system focusing on maritime compliances and regulations to ensure safety at sea and ashore

QDMS

Ship-shore integrated document management system, offering quality documentation, survey records, and data for HSEQ operations

Cerification

Catalog certification documents and survey records to ensure safe operation of vessels under management

HSEQ

ferryPAL's HSEQ module is an efficient safety and quality management system. It is a fully integrated system designed to ensure compliance with maritime regulations to ensure safety at sea and ashore.

- Audit and inspection planning
- Inspection Reporting Tool for mobile devices and offline work
- Unsafe Condition, Unsafe Act, Near Miss and Incident reporting
- Safety and Management Meetings
- Drill scheduling, reporting and lessons learned
- Risk assessment management
- Insurance review and approval of work permit
- Management of change process
- Behaviour Based Safety(BBS)
- Periodical reviews and action follow up
- KPIs, comprehensive set of reports and dashboard tiles

QDMS

QDMS is a ship-shore integrated module that minimizes the administrative burden of document management enhancing the safe and efficient operation of vessels. The module enhances safe and efficient operation on the vessels.

- Safety management manuals, quality management manuals, technical documents, rules and regulations etc. on shore and at sea
- Supports all internal and external document types, includes policies, procedures, forms, manuals, safety advisory notes etc.
- Efficient workflow for document creation, revision, review, approval, and publishing
- Full document controls throughout document lifespan e.g. versioning, archiving
- Full text or refined search, result list with document preview
- Efficient replication of documentation from shore to vessels
- Establish and implement common efficient policies and operating procedures
- Distribute best practices manuals across the fleet and organization

Certification

Standardize certifications and survey records related to the safe operation of vessels under management.

- Map certificates and surveys based on vessel types
- Provides transaction details with due date of certificates and surveys
- Graphical overview of expiring surveys, COCs, and memoranda along with document history

Finance

Accounts

Centralized management of financial accounting data

Financial Reporting

Verify financial reports, enter comments, and publish reports after ship managers' verification

Insurance

Efficiently and accurately record and process all types of ship management related claims

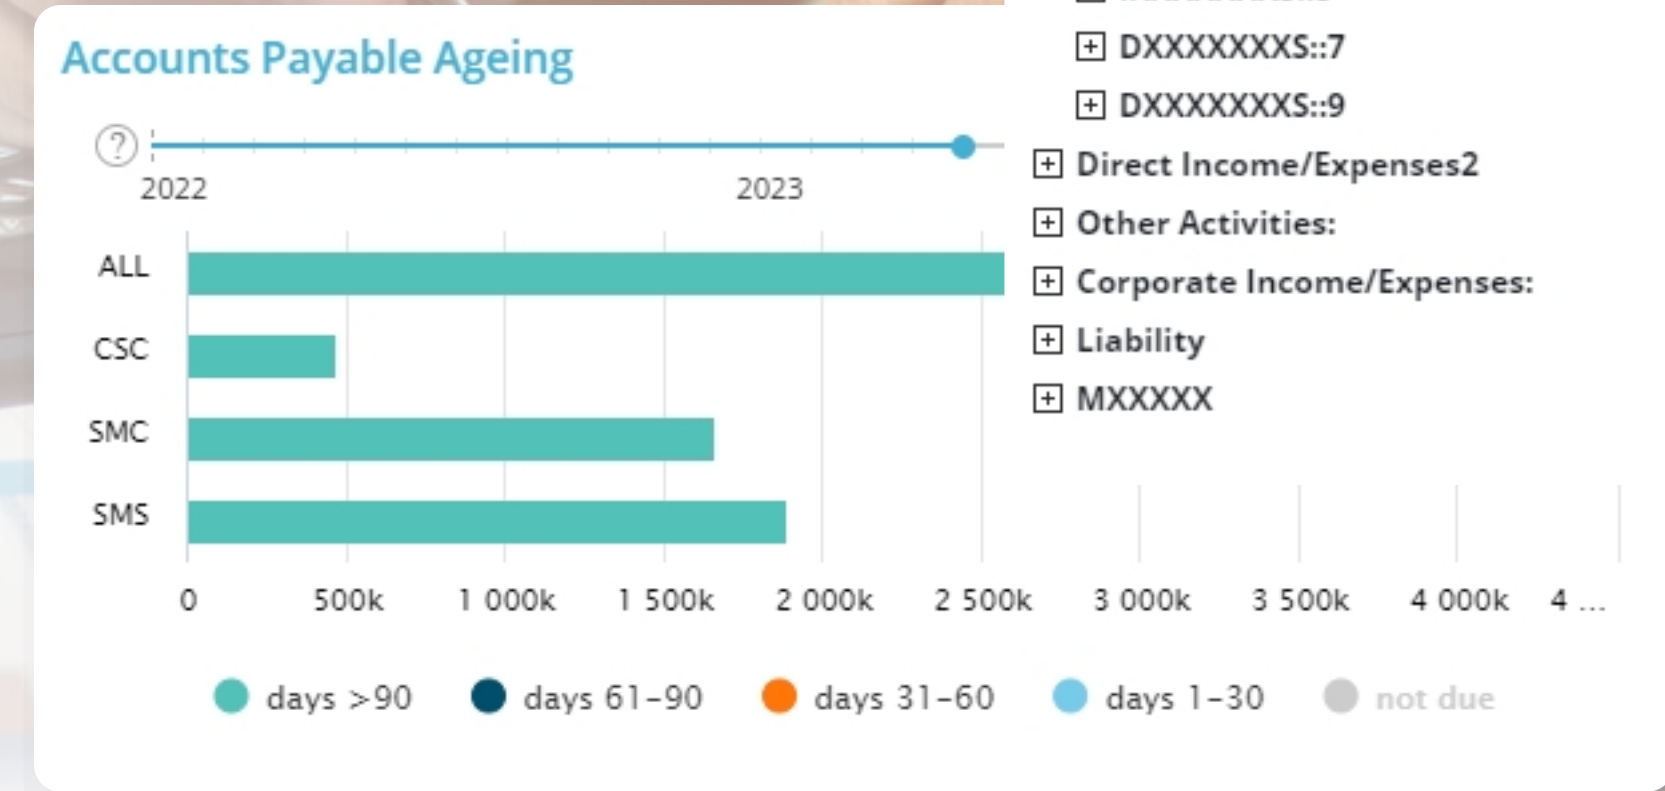

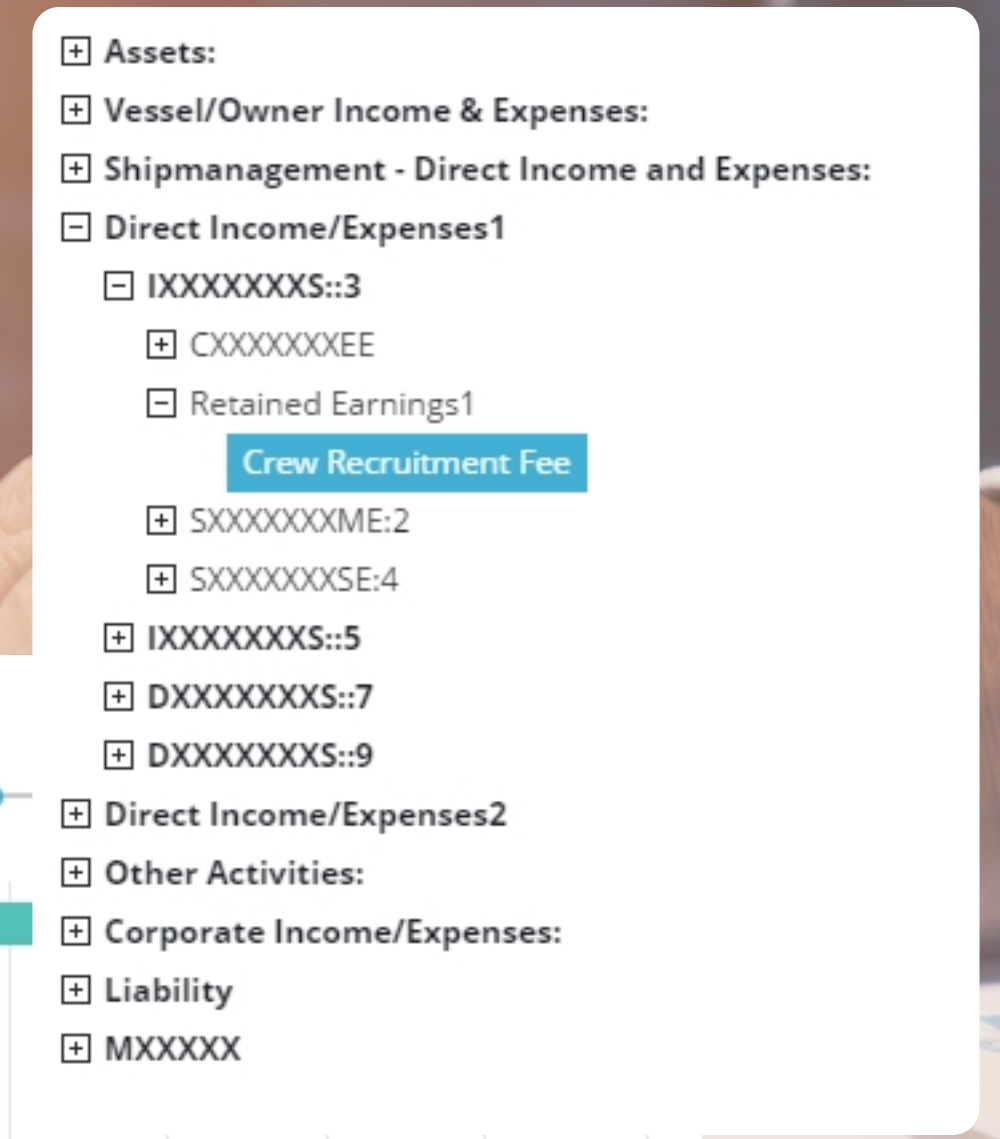

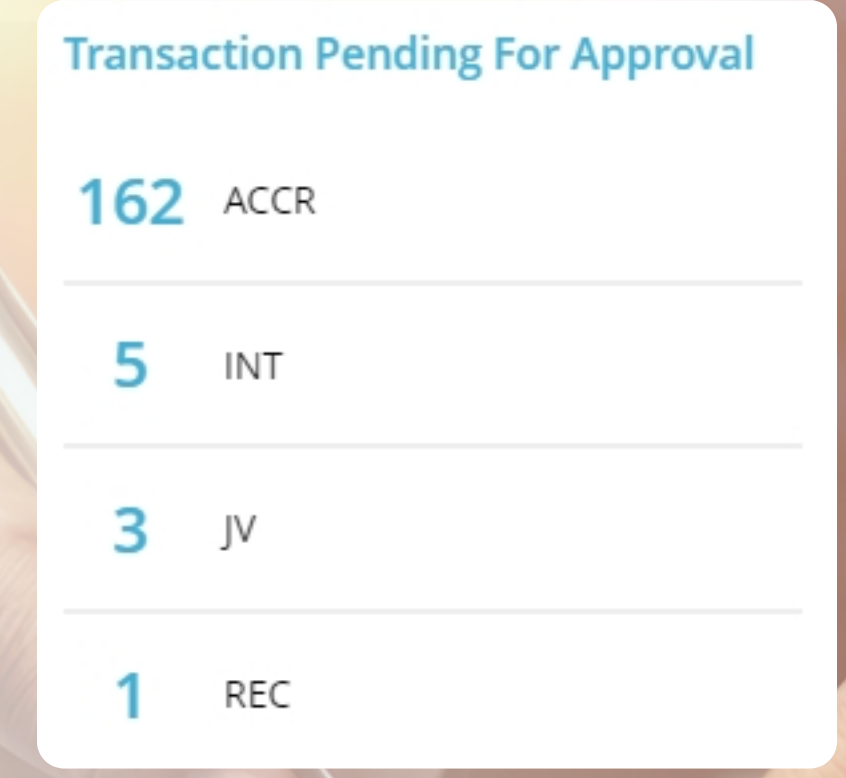

Accounts

A comprehensive maritime accounting software

A multi-national, multi-currency, and multi-company business accounting software, which can be integrated with other core modules such as Procurement, Crewing, and Payroll. Covering all aspects of ship management during the vessel management cycle.

- Customizable Owner presentation charts defined per entity budgeting
- Set up a new vessel entity in the system based on Owner contracts
- Invoicing the client/owner (accounts receivable), processing the received invoices (accounts payable), and ageing analysis reports (AR/AP)
- Monitoring vessel expenses and Owner cash position
- Direct banking transaction interfaces
- Detailed BI reports for supplier and client

Financial Reporting

Simplified report publishing from various sources and modules

A platform for publishing reports from various sources and modules e.g. Accounts. The module enables several types of configurations required for LiveFleet including alerts. Supports manual data upload if required.

Insurance

Providing organized maritime insurance and claims handling, reporting, and analysis for vessel and crew

ferryPAL's Insurance module is a comprehensive claims handling, reporting, and operational analysis tool.

This module provides a reliable and efficient way to record and process all types of ship management related claims.

- Review policy settings
- Management of incident details
- Expenditures and payment management
- Claim statements and cover letter generation
- Identify non-accepted items/cost
- Day-to-day claims process status update
- Review and approve claims
- Comprehensive set of reports and dashboard tiles

Maintenance

Efficiently track assets, assemblies, and parts associated with the vessel installation. The DNV type approved module can be configured according to the manufacturers'/class requirements.

- ClassNK, DNV, and ABS certified
- PMS data building utilities
- Equipment data management
- Order spare parts and items
- Data Library for job planning
- Maintenance completed and overdue analysis
- Condition Based Maintenance Data (CBMD) associated with the asset
- Detailed BI reports for supplier and client
- Pre-planning and scheduling of jobs containing cost and time projections
- Pre-planning capability provides key data to ensure inventory management based on predictive and preventive maintenance routines

The screenshot displays the MariApps software interface. On the left, a tree view shows equipment categories for vessel 665, including medical equipment, ship security, skylights, watertight doors, office equipment, galley/hotel equipment, refrigeration, elevators, cranes, gangways, ventilation, air conditioning, packaged air units, sewage treatment, domestic supply systems, main engine, propulsion motors, and stern tube seals. The main panel shows a 'Job Plan' tab with a table of maintenance jobs. Below this, a 'Basic Details' section includes filters for job type and status. A large table lists 52 records of jobs, including job category, job order number, job title, due date, due hours, job status, and job start/end dates. An inset chart titled 'Defect Jobs Count' shows a horizontal bar chart for vessels Alpha, Beta, Gamma, and Green, with segments for Completed (blue), Pending (dark blue), and Overdue (red) jobs.

Deloitte ISAE 3402 CERTIFIED TYPE II

Drydock

The Drydock module provides a comprehensive system for managing and processing dry dock operations, offering all the essential tools needed for dry dock jobs and a standardized platform for planning.

- Seamless integration with *ferryPAL*'s Maintenance and Procurement modules
- Pre-planning capability provides key data to ensure inventory management based on predictive and preventive maintenance routines
- Generate specifications and invitations to tenders
- Web module for yards to have direct access to enter quotations
- Multi-currency tender and quote comparison features
- Yard firm stemming and generation of purchase orders
- Job planner and a complete array of tracking tools
- Daily operational and financial progress reporting
- Project report compilation
