Digital Solutions. Maritime Focus.

MariApps Marine Solutions is a leading digital technology company dedicated to providing customized software solutions for maritime enterprises.

Our flagship product, *smartPAL*, is a comprehensive suite designed to meet the evolving needs of the maritime industry.

With a global team of over 1300 experts, MariApps is committed to supporting maritime businesses in navigating the complexities of the industry.

Your choice digital solutions partner

Global Reach

Global presence allows for effective catering to customers' requirements.

Proven Expertise

Proven implementation experience, on over 4000 vessels.

Swift Implementation

Efficient and prompt mobilization of resources to achieve fast implementation.

Long-Term Digitalization Support

Committed to support digitalization requirements based on fleet scalability of customer's needs.

Customized Solutions

Based on ship owners and ship managers requirements.

Industry Leading

Innovative, cyber-secure, and user-friendly software solutions with advanced web application performance benchmarks.

Why Choose

Covers all functional areas of ship management and ship owning

Intuitive and customizable, with built-in interfaces

Optimized processes and workflows to improve productivity

Web-based maritime digital solution designed for prompt implementation with plug-and-play modules

Customizable dashboard facilitating data-driven decision making and management through KPIs

Comprehensive video-based training modules with built-in self-assessment functions

Procurement

Simplifying purchasing operations

Procurement modules offer a great degree of flexibility in configuring the procurement business process, various approval levels, and budgets per company policy. *smartPAL's* intelligently designed purchasing solutions enable consumers to complete hassle-free purchase transactions in less time. The modules' several validations prevent human errors between transactions.

Procurement

Catering

Procurement

A comprehensive inventory and procurement management system that can be integrated with other onboard modules. It enables seamless data flow through the Planned Maintenance and Accounting applications that provide a powerful platform to track stock levels, forecast spares demand, job planning, manage vessel budgets, and track vendor turnover. *smartPAL's* Procurement application can be integrated with third-party Business-to-Business (B2B) platforms and Vendor ERP systems.

- Manage technical expenses against vessel budgets
- Optimize inventory based on reorder levels, forecast consumption, and lead time days including vendor management
- Process enquiries and quotations
- Quote comparison and approval
- Issue, track, and approve purchase and service orders
- Tracks goods deliveries, register, and approve invoices
- *smartPAL* V4 portal for safe and secure RFQ submission

Procurement

Catering

Procurement

Catering

Catering

The Catering software provides ship owners and ship managers with extensive onboard catering services. The Menu Planning feature simplifies the meal planning process onboard. Users can auto-generate provision requisitions with the help of the Chief Cook, collate costs onboard, and ensure the planning process is in line with the vessels' budgeting requirements.

- Detailed Menu Planning
- Calorie tracking for every menu planned
- Built-in multi-cuisine menus
- Complete purchase cycle
- Personalized reports
- Generate provision requests
- Food cost management
- Appraisal reports

HR & Payroll

Delivering exceptional crew experiences

The modules allow office users to manage the ship crew pool, sign on/off, transfers, and promote/demote seafarers. Access self-management portals for both new candidate seafarers and existing sailing crew. The portal enables sailors to keep their PAL-created CVs up-to-date, as well as their certifications, documentation, and licenses.

Crewing

Payroll

Sea Roster

New Applicant

Crewing

Centralized system to manage the activities and data of both seafarers working onboard and ashore. Manage employee contracts, payrolls, documentation, training, claims, expenses, and activities. Track activity year-round for salary and fee-based employees.

- Cloud-centric workforce management supported with mobile apps to track overall crew details anywhere, anytime
- Exchange quotations and PO budgets
- Crew management made seamless via Applicant Portal, with consistent data integration to other modules such as Crewing, Ticketing, Sea Roster, Payroll, *smartOps*, Procurement, Accounts, Insurance, Catering, and Seafarer Portal
- Custom dashboards with dynamic views for quick analysis and efficient decision making
- Integration with third party vendor systems such as Seagull, Videotel, OCIMF, Q88, and various other systems for effortless data processing
- Access comprehensive graphical planning of seafarers as per vessel requirement document checks. Provision to select crew based on management requirement and owner specifications

Payroll

A versatile and advanced payroll processing system to manage multi-national, multi-currency transactions, and payroll calculations for the crew onboard. Provides efficient management of monthly payrolls for both salary and fee-based seafarers. Seamlessly integrated with Crewing and Accounts modules for managing crew contracts, dispersal of wages, and automatic transaction interfaces. Export to various e-banking systems for payments with interfaces that additionally allow for the preparation of accounting entries.

- Monthly inputs, and shipboard deductions entered via the vessel module
- Payslip generation and processing
- Personalized allotment processing
- Payroll charges reporting
- Portage bill integration, incidental expenses, bookings, and payments
- Access payslips on Seafer Portal on web and/or mobile
- Wage and automated bonus calculator
- Configurable allotment and bank charges

Crewing

Payroll

SeaRoster

New Applicant

Sea Roster

Sea Roster is a crew management software that manages the requirements onboard for compliance with regulations for crew hours of work and rest (STCW 2010, ILO MLC, US OPA 90, and OCIMF recommendations). The crew management software closely monitors any repeat deficiencies and adjusts future working routines onboard to prevent excessive working hours and reduce fatigue amongst seafarers. Sea Roster can act as a standalone module or can be combined with Crewing, *smartOps*, and Accounts. It allows for the transfer of crew and vessel information, while the voyage plan is provided by the *smartOps* module.

- Tracking of work and rest hours based on guidelines by global manpower regulatory bodies
- Management of individual and bulk schedules
- Provision to create plan from templates
- Integration with payroll module for overtime calculations
- Data Library for job planning
- Integration with Crewing module for various seafarer related details
- Advance or D-day options
- Increases deferred efficiency in task management
- Japanese flag state requirements for regulations of work and rest hours

Technical

Effortless management of a vessel's technical operations

smartPAL's tightly linked technical solutions boosts user productivity in both the office and on board. The single-door technique significantly reduces crew efforts in job reporting and facilitates close module-to-module interaction.

Maintenance

DryDock

Maintenance

The Maintenance modules delivers the tracking of assets, assemblies, and parts associated with vessel installation. The DNV type approved product can be configured according to the manufacturer's/class requirements. The module possesses features that include pre-planning and scheduling of jobs containing cost and time projections. The pre-planning capability provides resource, time, and spares planning which plays a critical role in inventory management based on predictive and preventive maintenance routines.

- ClassNK and DNV type certified
- PMS data building utilities
- Equipment data management
- Order spare parts and items
- Data Library for job planning
- Maintenance completed and overdue analysis
- Condition Based Maintenance Data (CBMD) associated with the asset
- Detailed BI reports for supplier and client

Drydock

The Drydock module features a sophisticated dry dock processing and management system that facilitates operations during the entire dry dock process. It covers all the necessary functionalities required for dry dock jobs that are implemented in the system and offers an all-in-one standardized platform for dry dock planning.

- Seamless integration with *smartPAL*'s Maintenance and Procurement modules
- Full range of workflow capabilities from defect jobs tracking to dry dock specification building
- Generate specifications and invitations to tenders
- Web module for yards to have direct access to enter quotations
- Multi-currency tender and quote comparison features
- Yard firm stemming and generation of purchase orders
- Job planner and a complete array of tracking tools
- Daily operational and financial progress reporting
- Project report compilation

HSEQ

Health, Safety, Environment and Quality

Designed specifically for the shipping industry to help manage and improve HSEQ processes. Maintaining a vessel's safety standards, tracking certificates, risk management and incident reporting are a few examples of what can be achieved with *smartPAL's* safety modules.

HSEQ

QDMS

Certification

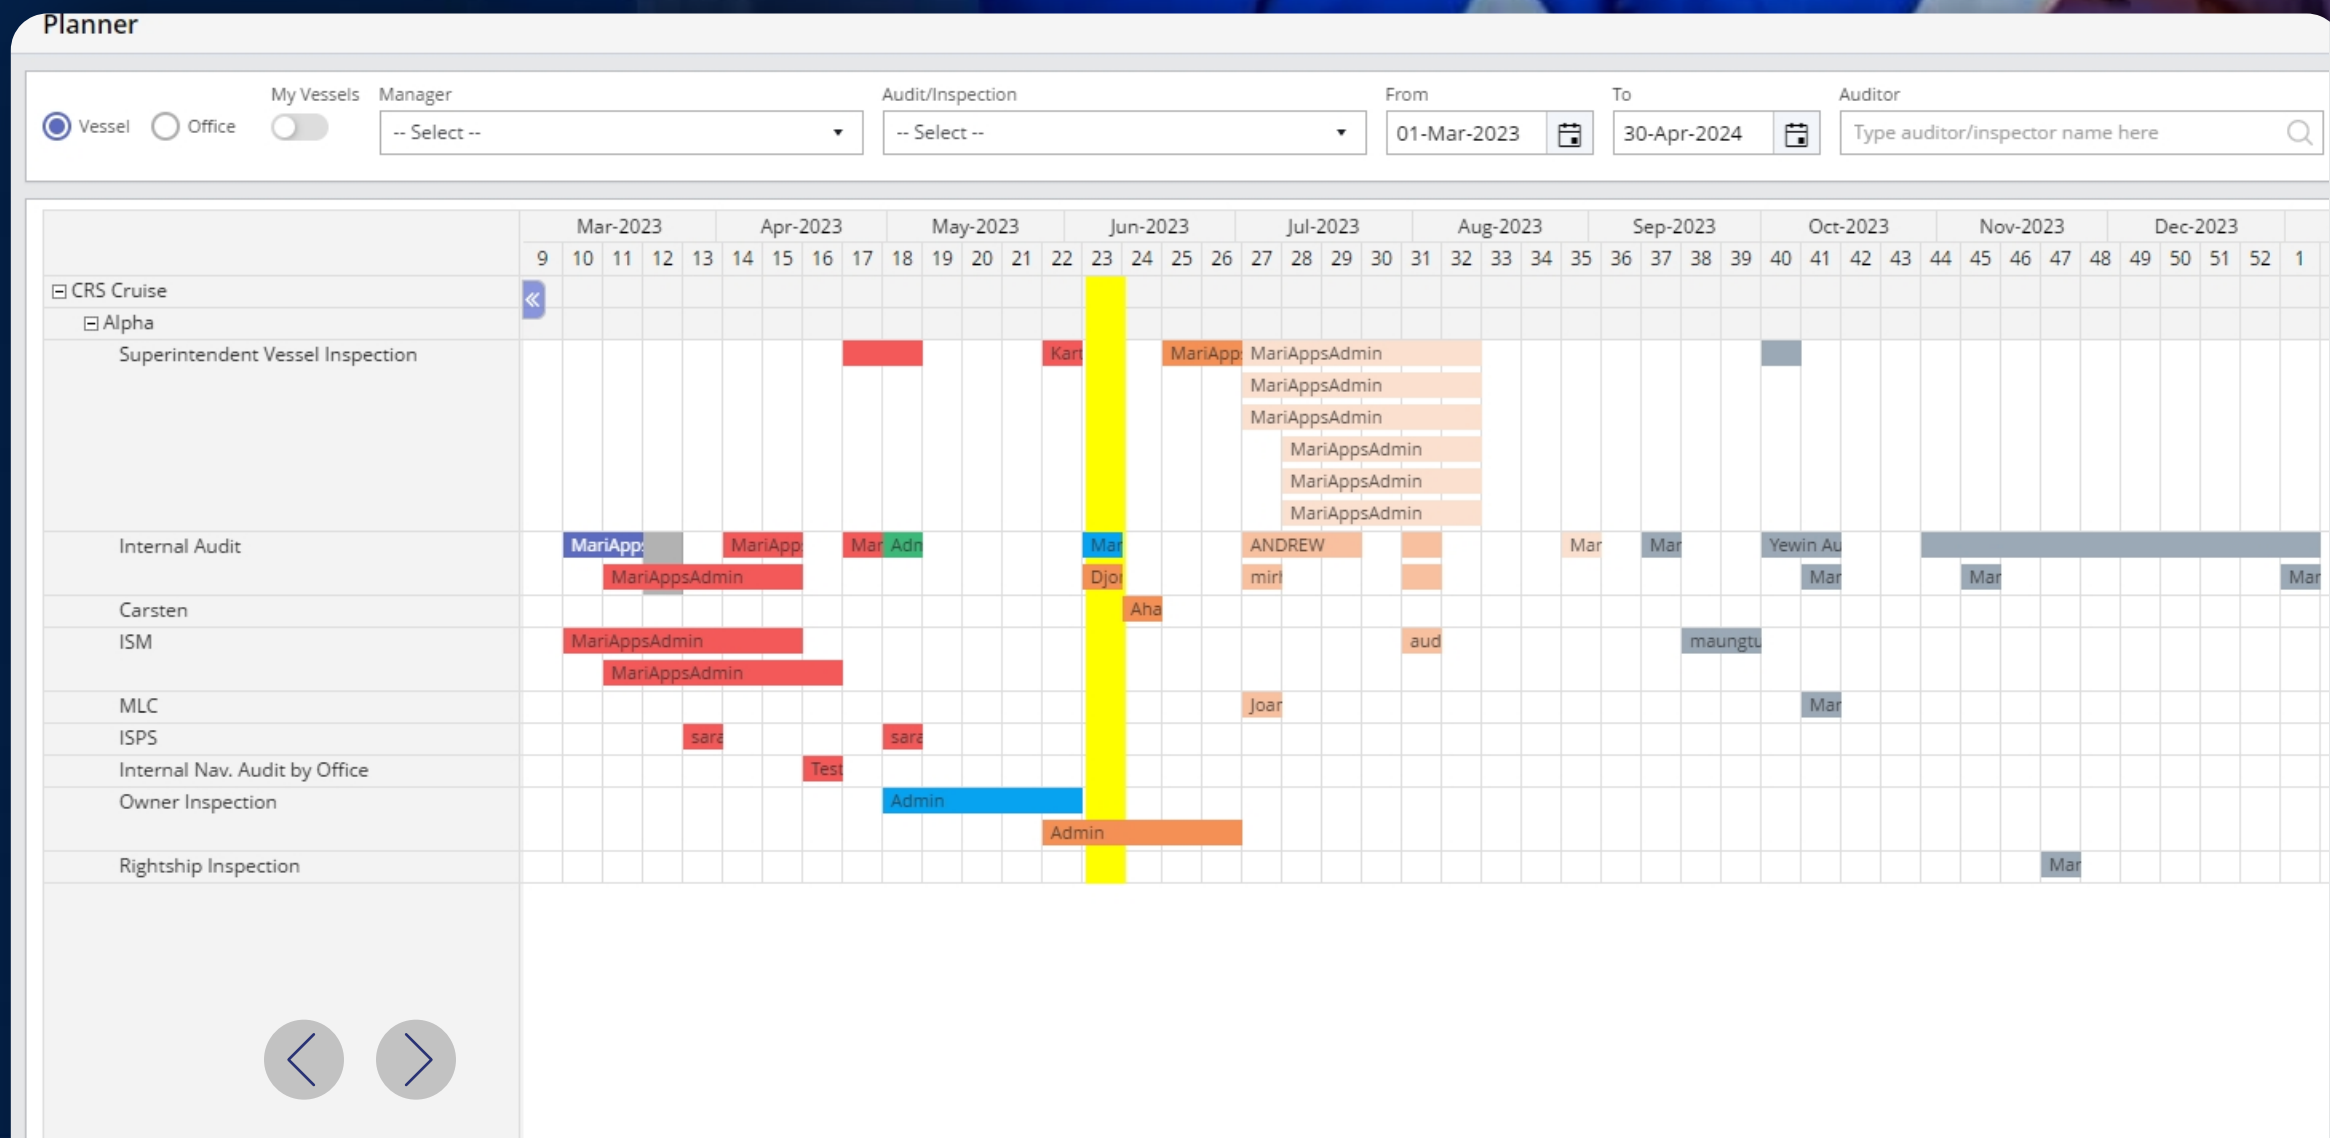

HSEQ

The HSEQ module is an efficient safety and quality management system. It is a completely integrated system which focuses on maritime compliances and regulations to ensure safety at sea and ashore.

- Audit and inspection planning
- Inspection Reporting Tool (IRT) for mobile devices and offline work
- Unsafe Condition, Unsafe Act, Near Miss and Incident reporting
- Safety and management meetings
- Drill scheduling, reporting, and lessons learned
- Risk assessment management
- Insurance review and approval of work permit
- Management of change process
- Behaviour-Based Safety (BBS)
- Periodical reviews and action follow-up
- KPIs, comprehensive set of reports, and dashboard tiles

QDMS

The QDMS module is a ship-shore integrated solution that allows the company to reduce the administrative burden of document management. QDMS provides shipping companies with the capability to establish and implement common efficient policies and operating procedures, distribute best practices across their fleet and organization. The module enhances safe and efficient operations on vessels.

- Safety and quality management manuals, technical documents, rules and regulations etc. at sea and ashore
- Supports all internal and external document types, including policies, procedures, forms, manuals, safety advisory notes etc.
- Efficient workflow for document creation, revision, review, approval, and publishing
- Full document controls throughout document lifespan e.g. versioning and archiving
- Full text or refined search, result list with document preview
- Efficient replication of documentation from shore to vessels

HSEQ

QDMS

Certification

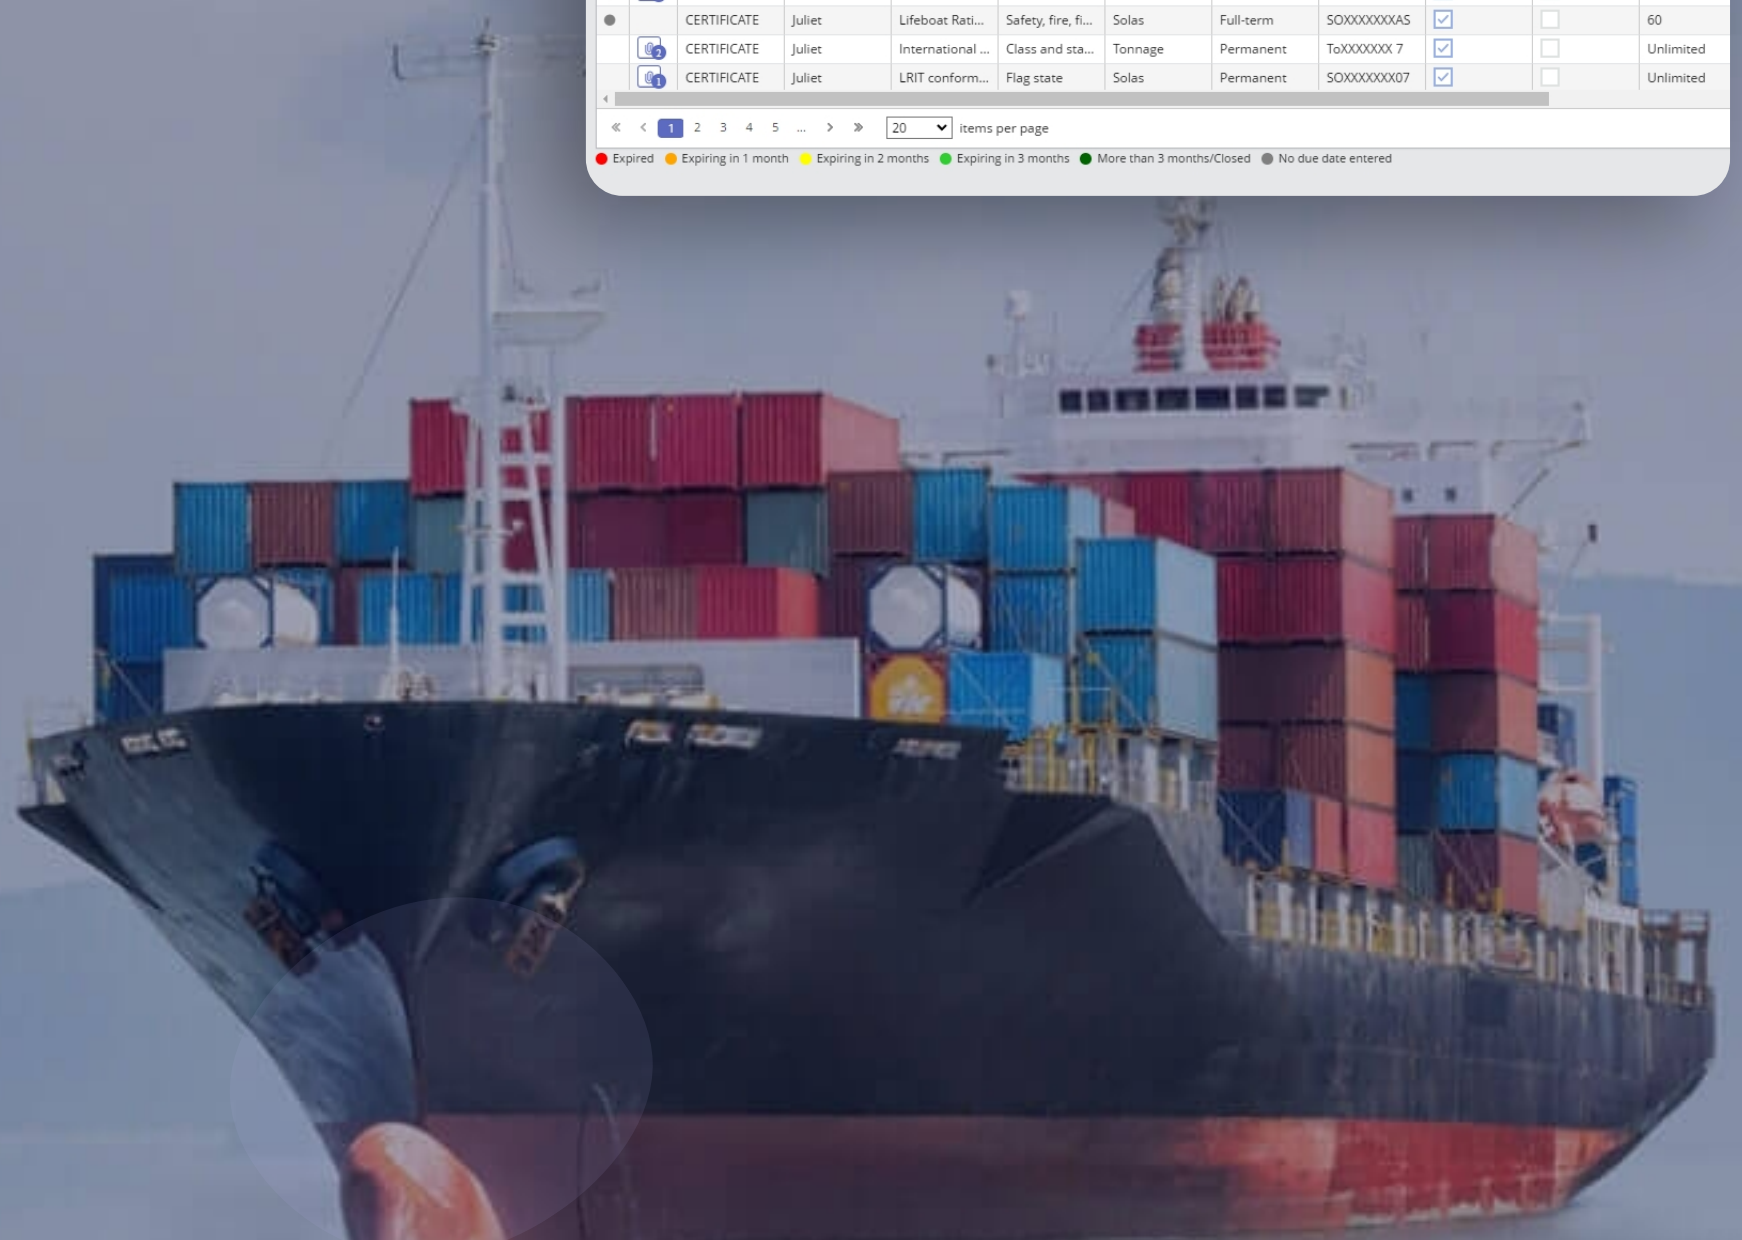

Certification

The Certification module provides a comprehensive and standardized software solution for all certification documents and survey records related to the safe operation of vessels under management.

- Map certificates and surveys based on vessel type
- Access transaction details with due date of certificates and surveys
- Graphical overview of expiring surveys, COCs, and memoranda along with document history
- Dashboard-based, one-stop automated alert system, presented through a dashboard interface that can be used to notify users when certificates for vessels are nearing their expiration dates
- Certificates and surveys are assigned color-coded statuses to indicate the urgency of action required. Red denotes immediate action is required, orange denotes action is required within a month, and yellow denotes action is needed within two months
- Enable the categorization of certification based on criteria such as class, safety, flag state, or according to specific needs of both for the company and the fleet

The screenshot displays the Certification software interface. At the top, there is a Gantt chart showing the expiration dates of various certification documents for June and July 2023. The chart uses color-coding: red for expired, orange for expiring in 1 month, yellow for expiring in 2 months, and green for expiring in 3 months. Below the chart is a 'General Report' window with a 'Tabular' view. The report shows a list of 439 records with columns for Document, Vessel, Name, Docum..., Sub Type, Term Ty..., Referen..., Active, Original Onb..., and Validity. The table includes entries for various certificates such as 'CERTIFICATE' for vessels like 'Romeo', 'Sierra', 'Foxtro...', and 'Juliet', with details on their types, terms, and active statuses.

Accounts Payable Ageing

Accounts

A comprehensive marine accounting software

A multi-national, multi-currency, and multi-company business accounting software, which can be integrated with other core modules such as Procurement, Crewing, and Payroll. It covers all aspects of ship management during the vessel management cycle.

- Customizable owner presentation charts defined per entity budgeting
- Set up a new vessel entity in the system based on the owner contracts
- Invoicing the client/owner (accounts receivable), processing the received invoices (accounts payable), and ageing analysis reports (AR/AP)
- Monitoring vessel expenses and owner cash position
- Direct banking transaction interfaces
- Detailed BI reports for supplier and client

Publish reports from various sources and modules with ease

A platform for publishing reports from various sources and modules e.g. Accounts. The module enables several types of configurations required for LiveFleet including alerts. Supports manual data upload if required.

I2P Bot

I2P bots provide cognitive automation solutions that enable an efficient purchase-to-pay cycle. MariApps' *smartPAL* presents I2P bots to scan, interpret and scan data intelligently for the invoice processing system which eliminates manual invoice processing.

Transform long cycle times and delayed payments into efficient and error-free digital invoice systems. I2P bots mitigate recurring manual processes with cognitive automation for invoicing and account payable automation thus enhancing the visibility of purchase procedures to make your business more efficient.

- Mitigates recurring manual processes
- Intelligent invoice processing solution
- Increases cost savings for supplier and vendor management
- Improves long cycle periods and delayed payments through an efficient and error-free system

Treasury

smartPAL's Treasury module is an innovative digital solution, that offers insights into your company's cash flow, enabling you to plan future business endeavors more effectively. With a focus on loan management, SWAP operations, and cash balance reporting, Treasury collaborates seamlessly with *smartPAL's* Accounts and Financial Reporting modules. Its dynamic and interactive dashboard, presented in a user-friendly environment, provides clear visual representations to enhance understanding and decision-making. Experience the capabilities of *smartPAL's* Treasury as it transforms your financial operations into a more efficient and insightful process.

- Keep track of the cash control balance of your companies
- Complete loan management
- Record principal payments, interest repayments, accruals, loan charges, and more
- Analyze loan-to-asset value ratio
- Cash forecasting

I2P Bot

Treasury

Fixed Assets

Fixed Assets

The Fixed Assets module is designed to streamline and enhance asset management across the maritime industry. The platform offers a comprehensive approach to tracking, depreciating, and maintaining your fleet's assets, ensuring compliance and efficiency.

- Maintain fixed asset registry
- Perform transactions (depreciations and revaluations)
- Generate and post accounting entries
- Access comprehensive reporting tools
- Lease asset management

The screenshot displays a software interface for Fixed Assets management. At the top, there are summary statistics: Total (1796), Draft (735), Active (1023), Sold (28), and Disposed (10). Below this is a table with columns for Entity, Asset Code, Asset Component, and Asset Number. A 'Create new Asset' form is overlaid on the right, with fields for Asset Name, Company (BHARATH LTD), Asset Type (Vessel), FA Entity (USD), Tax Year (2024), Asset Category (Corporate New Straight FR M), Tax (Select), and Reporting (Select). A 'Component' dropdown is also visible. In the foreground, a donut chart shows the 'Total' value of 1796, broken down into Draft (735), Active (1023), Sold (28), and Disposed (10).

Commercial

The Commercial module features a shore specific tool for charterers to manage the entire pre-fixture part of vessel employment. With this module charterers can set hire rates for vessels, pool types, and manage contracts.

- Maintains vessel details on employment, charter party, and brokers, which addresses commissions and cost templates
- Supports all internal and external document types including policies, procedures, forms, manuals, safety advisory notes etc.
- Tracks vessel availability, schedules, and delivery status
- Updates charterers about hire/off hire status of vessels
- Reconciles owner and charterer expenses
- Generates invoices that tally with the Accounts module
- Chartering reports

Commercial

Insurance

The Insurance module is a comprehensive claims handling, reporting, and operational analysis tool. This module provides a reliable and efficient way to record and process all types of ship management related claims.

- Policy settings
- Management of incident details
- Expenditures and payment management
- Claim statements and cover letter generation
- Identifying non-accepted items/cost
- Day-to-day claims process status update
- Review and approve claims
- Comprehensive set of reports and dashboard tiles

LiveFleet

The LiveFleet module is designed for ship owners to access all key vessel information at a glance. Owners can track vessels in near real-time and stay informed on all key parameters with vessel tracker.

- Vessel and voyage performance
- Planned maintenance and purchase reports
- Technical details, financial, and operational reports
- Noon reports and vessel performance metrics
- In-depth data analytics
- Automated alerts
- Crew lists and distribution by nationality

The screenshot displays the LiveFleet mobile application interface. On the left, a list of alerts includes: 01 Drydock Planned (in next 3 months), 05 Vessels Non-Compliance (in last 100 months), 64 Consumption Alerts (in last 60 months), and 01 Vessel OPEX Over Budget (8% over budget). A search bar at the top allows filtering by Vessel or Port, with options for SM UK, SM China, SM Cyprus, SM India, and SM Singapore. A central panel shows OPEX Variance (USD) for Jan 2018 to Sep 2018, with a total variance of \$ 320,893. A 'show Track' button is visible. The main view features a large image of a container ship, the Gamma, with its current speed of 1.74 kn. Below the ship image, the port call schedule is listed: Kashima, Ibaraki, Japan (ATA: 18-MAY-2023 08:06 UTC) and Singapore, Singapore (ETA: 07-JUN-2023 00:00 UTC). The last update timestamp is 13-May-2023 9:00:43 UTC.

Value Added Products

-  **Ticketing**

Simplify travel management with Ticketing's unified platform. Seamlessly create, track, and manage travel requests, integrated with HRM and Accounting modules.

-  **MAXv**

MAXV, allows for comprehensive monitoring of all information and data transfer in the system, safeguarding vessel systems and data from any type of digital attack or compromise.

-  **IRT**

Enhance vessel inspections with IRT, a comprehensive ship safety management software. Capture audio comments, photos, and scores for transparent and accurate data and reports, whether as a standalone app or an extension of the HSEQ desktop module.

-  **PAL eXtrack**

Effortlessly manage employee expense claims and reimbursement with PAL eXtrack. Streamline processes, eliminate manual tasks, and enjoy convenient web and mobile access for seamless submission, verification, and approvals.

-  **BI**

Powered by intelligent analytical tools that scan, monitor, and showcase trends of near real-time data, users can share parameterized reports effortlessly with external clients and stakeholders.

-  **eRBooks**

Electronic Record Books are designed to replace the conventional paper-based record books. An intuitive web-based application that helps comply with relevant regulatory body requirements.

-  **eLogs**

eLogs is a flexible and dynamic electronic log book tool designed to work with various types of ships and operations. In addition to the standard library of ship specific and company specific events it can be easily added and configured for vessels.

-  **Seafarer Portal**

Streamline crew management with Seafarer Portal, serving as an all-in-one solution for enhanced ship operations. Optimize crew deployment, facilitate seamless communication, and streamline employee contracts, payroll, documents, training, claims, expenses, and activity tracking.

smartOps

smartOps is an advanced fleet performance analytics platform that supports the optimization of vessel operations

- Utilize data reported through a state-of-the-art vessel application, telemetry data recorded directly from sensors, as well as position and weather data. Vessels are benchmarked against their own tailored digital twin, with results delivered in a clear and user-friendly manner
- Manage decarbonization, while enabling cost and reliability efficiencies through predictive and proactive insights transparently, ashore, and onboard

KEY FEATURES

eConnect

eConnect is a web-based, end-to-end e-commerce solution that provides reliable and efficient processing of transactions. eConnect features a direct interface for exchange of goods and services which can be integrated with external systems and other *smartPAL* modules, enabling seamless data flow throughout transactions.

- Update vendor profile
- Exchange quotations and PO budgets
- Goods received and invoices with vendor sets
- Alerts and notifications on information exchanges
- Export and import data through excel budgets
- Feasible integration with logistics solutions, warehouses, and forwarders budgets
- Flexibility in data exchange format budgets
- Improve communication, performance, and process efficiency budgets

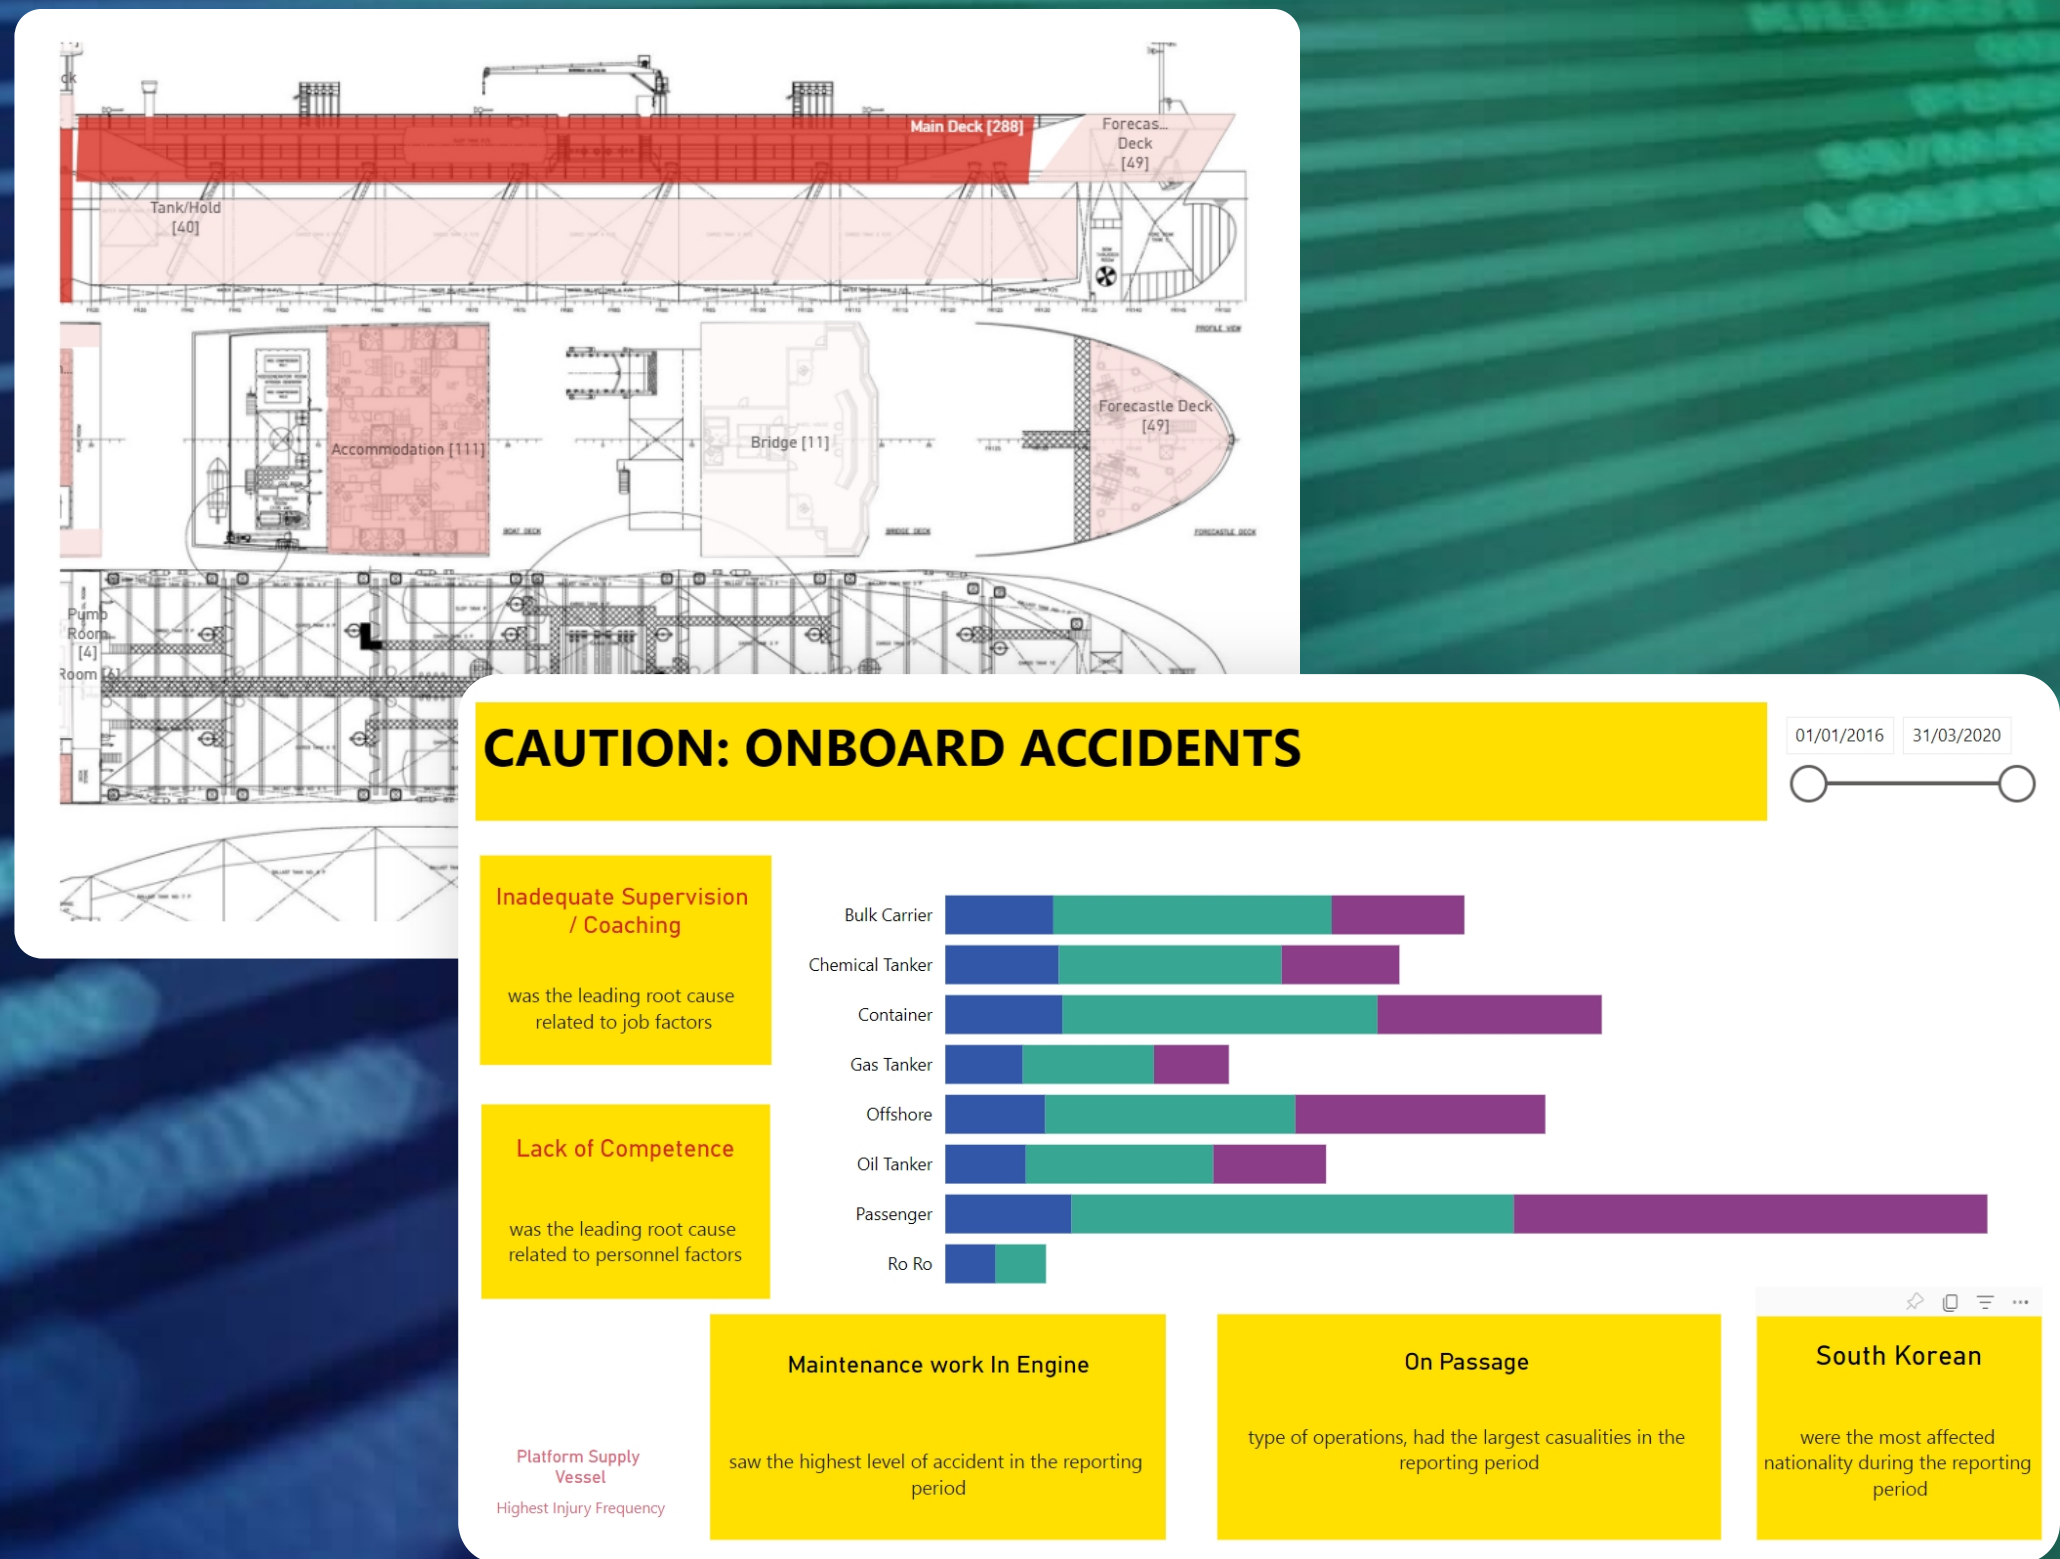

BI

BI

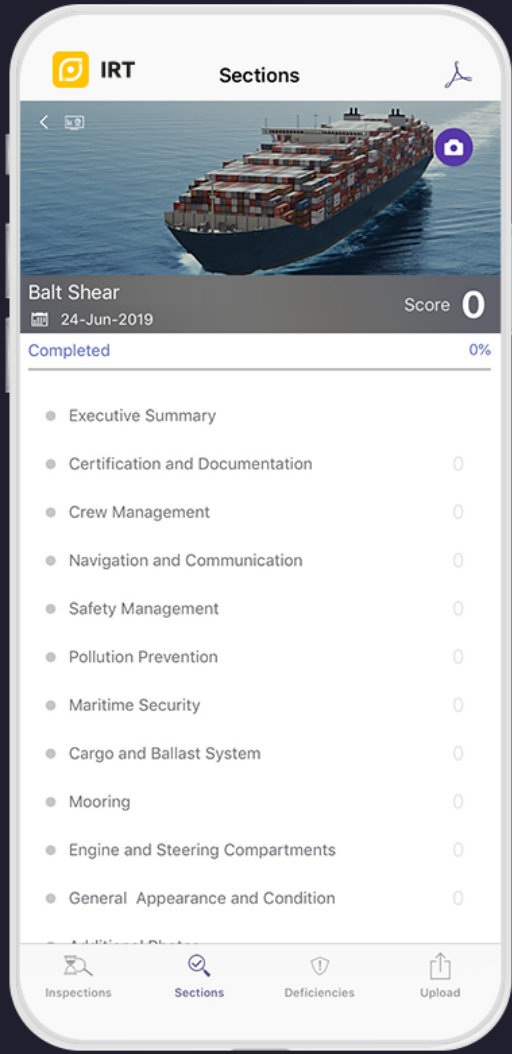

An advanced business analytics tool for visualization of data. BI simplifies and analyzes a large amount of data derived from other *smartPAL* modules. Create business insights with customizable and interactive dashboards and reports for efficient decision-making. BI provides comprehensive reports, charts, and graphs of complex data, easily accessible from the web and/or mobile devices.

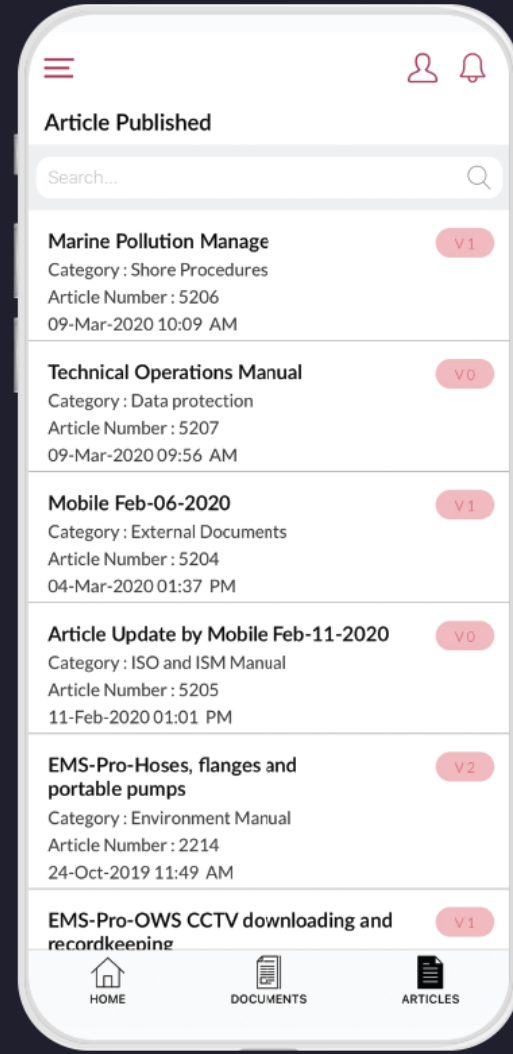

- Provides snapshots on valuable information and data from multiple sources
- Monitor vessels for individual offices with a drill down function
- Study variance in cost and related factors with office to vessel level analysis
- Monitor fleet-wide performance
- Navigate through *smartPAL* system from reports
